- (\*\*\*\*\*) *Department Genetics and Animal Breeding, Academy of Agriculture, al Mickiewiczza 24/28, 30-059 Krakow, Poland*

The results of a survey of computer programs used in teaching animal breeding is reported. The value of computer teaching aids is discussed and a number of recommendations are made.

### EXPERIENCE WITH COMPUTER SIMULATION OF A DAIRY POPULATION IN TEACHING ANIMAL BREEDING

H. SCHULTE-COERNE

*Institut f. Tierzucht und Tierfütterung der Universität Bonn,  
Endenicher Allee 15, 5300 Bonn (FRG)*

A report is given on a computer generated practical simulating a dairy population. Basic models and practical work are described. Also objectives and principles of teaching are presented and experiences from three year's practicals are discussed.
